

# DELIVERY HOSE COUPLINGS AND ADAPTORS

## GENERAL

**"AE"** range of instantaneous couplings are manufactured in accordance with BS 336 standard. The delivery hose couplings are available in BS 1400 LG2 gunmetal or BS1490 LM25 aluminium alloy material.

The standard size is 65mm instantaneous connection with 65mm ribbed tail. Other hose tail size, eg., 40mm, 45mm, 50mm, etc., are also available on request.

Symetrics Guillemín couplings, adaptors and caps are manufactured in accordance with NF A 57-702. They are generally produced from BS1490 LM25 aluminium alloy material.

Various types of adaptors are also available in gunmetal or aluminium alloy material.

Products manufactured from BS1490 LM25 aluminium alloy material are heat treated for strength, toughness and durability.

The quality of the castings, workmanship and the final finishes are the hallmark and pride that we undertake to produce the products to the satisfaction of our customers.
